The techniques behind Agile can provide gains in areas well beyond the delivery of software projects, developing new products or other traditional Agile uses. However, in order to make it work, we need to make important modifications to how program managers (PMMs) operate. The hardest part is not to change the way people work, but to change the way people think, including altering people's expectations, and how they are measured and compensated. Modifications in not just in how they work, but mostly in how they work together.

A Program Manager can split up a program into multiple projects and monitor the progress of each project. The Program Managers can create Agile board in each project to track the progress of the project. Program Managers can collaborate with Project Man

Program management has been a growing job category over the last 20 years largely due to its increased visibility in the software and marketing industries. Yet there can be confusion or inconsistency from industry to industry and pany to pany on wha, Instead of 'scaling agile' consider 'scale projects to a program'. Program management is how we move from coordinating one project's work to coordinating the work of several projects in a program.
