"Reseña del editor A highly updated and revised edition, this book combines a practical, how-to approach with a research context. It also describes the process for developing and maintaining a fall prevention program in such institutions and outlines the highly acclaimed Morse Fall Scale, which has been adopted by the VA Hospital System and many more hospitals around the U.S.It includes a discussion of the process of implementing a fall prevention program in an institution using the Morse Fall Scale. It offers information for understanding how the scale works, and for evaluating the incidence, frequency, and severity of falls with rates of prevention. It features a revised appendix and new research section. Contraportada 320 Biografía del autor Janice M. Morse, PhD (Nurs), PhD (Anthro), FCAHS, FAAN, is a professor and Barnes Presidential Chair, College of Nursing, University of Utah, Salt Lake City, and professor emeritus, University of Alberta, Edmonton, Canada. Her research contributions include the development of the Praxis Theory of Suffering and Comforting, the Morse Fall Scale (in use internationally), and the advancement of qualitative and mixed-method research. She has edited Qualitative Health Research (QHR) and Global Qualitative Nursing Research, and was founding editor of the International Journal of Qualitative Methods (IJQM). Her publications include Compassionate Nursing, Principles of Mixed-Method Designs, Preventing Patient Falls (Springer Publishing Company), and texts for several qualitative methods. In 1997, she founded the International Institute for Qualitative Methodology (IIQM), directing a network of eight international hubs and 115 universities, supporting training for QHR and mentoring qualitative researchers globally. She was the recipient of the fifth Sigma Theta Tau Episteme Award, an inductee of the Sigma Theta Tau Hall of Fame, and has received honorary doctorates from institutions in Australia and Canada."
