"Pressestimmen We seem to have convinced ourselves that higher-level creativity and intuition are uniquely human traits. Why? Why could a machine one day not create a truly original work of art, write a moving poem, compose an opera, or even discover a mathematical theorem? The answers, in this compelling and thought-provoking book by mathematician and musician Marcus du Sautoy, can be found by breaking down what it actually means to be creative.--Jim Al-Khalili, Professor of Theoretical Physics and Presenter of The Secret Life of ChaosFact-packed and funny, questioning what we mean by creative and unsettling the script about what it means to be human, The Creativity Code is a brilliant travel guide to the coming world of AI.--Jeanette WintersonAlgorithms that not only duplicate human skills but learn from their mistakes are what define artificial intelligence. But du Sautoy considers the possibility of reaching another stage: machine creativity, technology that is itself capable of innovation.-- (02/08/2019)Algorithms are often seen as opaque or dangerous forces, fueling our fears of apocalypse/the ghost in the machine. But if art is an early warning system and artists the experts at making the invisible visible, then Marcus du Sautoy is, in this remarkable consideration of the limitations and possibilities of AI, the light-bearer, illuminating not only the work of coders and creators, but the mathematics of chaos that underpin art.--Hans Ulrich Obrist, Director of the Serpentine Gallery and author of The Interview Project Über den Autor und weitere Mitwirkende Marcus du Sautoy is the Charles Simonyi Professor for the Public Understanding of Science and Professor of Mathematics at the University of Oxford and the bestselling author of The Music of the Primes, Symmetry, and The Great Unknown. A trumpeter and member of an experimental theater group, he has written and presented over a dozen documentaries, including The Code and The Secret Rules of Modern Living: Algorithms. He also created the codes for Lauren Child's Ruby Redfort mysteries. He has received the Berwick Prize, the Zeeman Medal, and the Royal Society's Michael Faraday Prize, among other honors."

The creativity code art and innovation in the age of ai marcus du sautoy 2019 in the creativity code he considers what machine learning means for the future of creativity programs like deep dream produce drip paintings that could fo

Meanwhile 35 elementary school age children were less likely to suppress emotional expression after 10 months of acting than 40 peers in a visual arts class psychology of aesthetics creativity and the arts may 2013 an earlier report on the same study showed that, this lesson looks at the theme of creativity and innovation access the face to face classroom and online teaching version of the materials introduction the lesson begins by looking at what is involved in , arts based learning for creativity
