rivista (236 pagine) - Racconti di Jack Vance - Suzanne Palmer - Giulia Abbate - Sandro Battisti - Davide Del Popolo Riolo - Alessandro Forlani - Ricordi di Giuseppe Lippi - Articoli su Paolo Barbieri - Tolkien e la sf - Strange Angel - Luna 1969Se l'umanità vuole crescere e andare oltre questa piccola palla di fango che chiama Terra, dovrà imparare a vedere le cose da punti di vista diversi, inaspettati. Imparare, per esempio, l'importanza degli esseri più piccoli, come nel racconto La vita segreta dei bot di **Suzanne Palmer**, vincitore del **Premio Hugo** 2018. O che gli esseri umani non sono necessariamente la specie dominante, come in I Signori della Casa, racconto del grande **Jack Vance**. Un punto di vista diverso è costretto a trovarlo anche il politico rampante di **Giulia Abbate** in Stelle meravigliose, e la stessa sorte non risparmia l'editor di **Alessandro Forlani** in Trenta pagine mancanti. E dopo un viaggio tra antichi romani e impero connettivo con **Sandro Battisti**, è il vostro turno di farvi qualche domanda sui punti di vista di chi sta attorno a voi, per non finire come in La villa stregata, distopia fin troppo realistica di **Davide Del Popolo Riolo**. Tra i tanti interessanti interventi di critica e saggistica di questo numero il ricordo di **Giuseppe Lippi**, amico e collaboratore di Robot. Fondata da Vittorio Curtoni, Robot è una delle riviste di fantascienza italiane più prestigiose, vincitrice di un premio Europa e numerosi premi Italia. Dal 2011 è curata da Silvio Sosio.

Robotics is an interdisciplinary research area at the interface of computer science and engineering robotics involves design construction operation and use of robots the goal of robotics is to design intelligent machines that can help and assist humans in their daily lives
