"Críticas Our middle school teachers have been very happy with the format and are looking forward to using this resource next academic year. Some of the things they like about it are that it does have more practice problems than our present resource and that all the topics explored at each level are in a single book which makes it easier for students to manage. (Phil Bennett, Academic Leader Mathematics, International School of Luxembourg) These are the best Maths resources for this level that I have ever taught from. We love the homework books which offer extra practice to consolidate core content. (Carolyn Hatton, Head of Mathematics, King Richard III College, Spain) Reseña del editor Written by experienced examiners to comprehensively cover the revised Cambridge Lower Secondary curriculum, this course will thoroughly prepare your students to excel in the Checkpoint test and offers rigorous challenge that will give students a flying start in the Cambridge IGCSE. With a methodical and logical approach that matches the new framework, carefully developed exercises will stretch students while the sheer volume of practice will reinforce understanding. Complete Mathematics is the new name for Oxford International Maths."
