Recent study of modular building was focussed on light steel framing applied to modular buildings followed by consideration

The innovative and revolutionary new ETABS is the ultimate integrated software package for the structural analysis and design of buildings Incorporating 40 years of continuous research and development this latest ETABS offers unmatched 3D object based modeling , B S HARSHA et al International Journal of Research Sc, A practicle example would be?the design of baseplate connections lets say You want to design your connections based on the forces you get from ETABS model on support?and you provided FIXED supports? infinite stiffness after realizing that the structural reactions are very hi.
