"Synopsis Whether you've watched your lively youngster gradually slow down over the years or whether you adopted an older dog from the start, living with a senior presents a special set of challenges. In fact, geriatric dogs often experience physical and behavioural changes that can be detrimental to their well-being and decrease their overall quality of life. Is it possible to prevent or manage these effects of ageing in a canine? How can you prolong your senior's life without compromising its quality? Perhaps most importantly, how can you help your beloved friend age with grace and dignity? 'The Living Well Guide for Senior Dogs' will answer these questions and teach you how to manage age-related changes, apply preventative care techniques, and promote wellness in your older dog. This book also features nutrition plans for the ageing canine, reward-based training refresher courses, solutions to age-related problem behaviours, extensive coverage of a variety of health conditions affecting senior dogs, tips on how to help prevent common signs of ageing and advice on how to handle end-of-life issues. Your dog's golden years are a gift to be treasured and appreciated. This guide to living well will help you and your senior make the most of them!"

**As a general rule a dog is considered a senior around the age of seven however this varies a bit for each dog the typical lifespan of a dog is said to be 12 to 15 years smaller dog breeds tend to live longer**
