"Pressestimmen ?*Sea People* is a roaring success.? A deeply interesting read, and at points incredibly moving.? (NPR)?Compelling.? These pages will unleash the imagination [and] spark insight.? (*National Geographic*)?*Sea People* is a rich compendium of the ways Polynesia has been pinned down on the maps of geography, history, and culture through the centuries. As Thompson so eloquently shows, such descriptions are only half of a story.? (*Harper?s Magazine*)?I loved this book. I found *Sea People* the most intelligent, empathic, engaging, wide-ranging, informative, and authoritative treatment of Polynesian mysteries that I have ever read. Christina Thompson?s gorgeous writing arises from a deep well of research and succeeds in conjuring a lost world.? (Dava Sobel, bestselling author of *Longitude* and *The Glass Universe*)?Christina Thompson?is perhaps ideally placed to try to answer the question [of Polynesian origins] ? and in *Sea People*, her fascinating and satisfying addition to an already considerable body of Polynesian literature, she succeeds admirably.? (*New York Times Book Review*)?Magnificent? A grand, symphonic, beautifully written book? *Sea People* is an archive-researched historical account that has the page-turning qualities of an all-absorbing mystery.? (*Boston Globe*)?Christina Thompson?s outstanding study brims with detail.? (*Nature*)?Fascinating? A piece of beautiful nonfiction writing.? (WBAA, an NPR affiliate)?Superb. . . An illuminating read for amateur sleuths and professional scholars alike.? (*The Spectator*)?The supra theme of *Sea People* is a vision of knowledge systems intertwined ? the outcome of history, cultural tolerance, and a grasp of misunderstandings. Thompson?s tone is perfectly tuned for such enlightenment, as is the life-position from which she writes.? (Sydney Morning Herald) Buchrückseite For more than a millennium, Polynesians occupied the remotest islands in the Pacific Ocean, an enormous triangle stretching from Hawaii to New Zealand to Easter Island. Sailing in large, double-hulled canoes, without the benefit of maps, writing, or metal tools, these ancient mariners were the first and, until the era of European discovery, the only people ever to have reached this part of the globe. Today, they are widely acknowledged as the world?s greatest navigators. But how did the earliest Polynesians reach these far-flung islands? How did they conquer the largest ocean on the planet? Diving deep into the history of the Pacific, Christina Thompson explores this epic migration, following the trail of the many sailors, linguists, archaeologists, and geographers who have puzzled over this story in a quest to discover who these ancient voyagers were, where they came from, and how they managed to colonize every habitable island in the vast region of remote Oceania.*Sea People* combines the wonder of pursuit and the drama of a gripping historical puzzle in a vivid tour of one of the most captivating regions in the world.
