Este libro muestra una visión amplia del mundo de la bioconstrucción, y acerca a cualquiera que lo desee al arte de crear espacios saludables, ecológicos y armoniosos. La estructura de los capítulos sigue paso a paso el desarrollo de un edificio: el nacimiento de la idea, la ubicación, la búsqueda de quienes van a intervenir en el proyecto, su desarrollo, la contratación, la construcción, los acabados, la decoración, etc., hasta su total materialización. Materiales sanos, diseños armoniosos, formas creativas y espacios de luz y color son algunos de los criterios esenciales para crear nuestro espacio vital.
