"Pressestimmen Examining the World Inequality Report--...by the creators of the World Wealth and Income Database, who include the economists Thomas Piketty and Emmanuel Saez--it is tempting to see the rising concentration of incomes as some sort of unstoppable force of nature, an economic inevitability driven by globalization and technology... And yet, a careful examination of the data suggests there is nothing inevitable about untrammled inequality.--Eduardo Porter and Karl Russell'New York Times' (12/14/2017)Back in 1980, the bottom 50 percent of wage-earners in the United States earned about 21 percent of all income in the country--nearly twice as much as the share of income (11 percent) earned by the top 1 percent of Americans. But today, according to [World Inequality Report 2018], those numbers have nearly reversed: the bottom 50 percent only take in 13 percent of the income pie, while the top 1 percent grab over 20 percent of the country's income.-- (12/15/2017)Three and a half years ago, the English publication of Thomas Piketty's surprise bestseller, Capital in the Twenty-First Century, sparked an international debate about the roots of rising inequality. Today, [World Inequality Report 2018] makes for equally sobering reading: The gap between rich and poor has increased in nearly every region in the world over the past few decades.-- (12/14/2017)The 2018 World Inequality Report shows the share of wealth held by the top 1% of earners in the U.S. doubled from 10% to 20% between 1980 and 2016, while the bottom 50% fell from 20% to 13% in the same period.-- (05/07/2018)Sure to spark discussion on national policy and its effects on wealth and inequality, making it a much-needed resource.--Muhammed Hassanali'Booklist' (09/07/2018)Sure to become a standard source for data on income and wealth inequality.--Richard N. Cooper'Foreign Affairs' (11/01/2018) Über den Autor und weitere Mitwirkende Facundo Alvaredo is Co-Director of the World Wealth and Income Database (WID.world) and of the World Inequality Lab.Lucas Chancel is Co-Director of WID.world and of the World Inequality Lab and Senior Research Fellow at the Institute for Sustainable Development and International Relations.Thomas Piketty is Professor at the Paris School of Economics and at the École des Hautes Études en Sciences Sociales (EHESS).Emmanuel Saez is Co-Director of the World Wealth and Income Database (WID.world) and of the World Inequality Lab and Professor of Economics at the University of California, Berkeley.Gabriel Zucman is Co-Director of the World Wealth and Income Database (WID.world) and of the World Inequality Lab and Assistant Professor of Economics at the University of California, Berkeley."
