"Pressestimmen 'This practical text is a must read for leaders developing or refining NORA services. it is invaluable especially for hospital leaders, physicians, and proceduralists, including anesthesiologists who are planning to add or expand non-operating room services. This text can be recommended to all anesthesia care providers involved in the provision of anesthesia in non-operating room settings.' 'This practical text is a must read for leaders developing or refining NORA services. it is invaluable especially for hospital leaders, physicians, and proceduralists, including anesthesiologists who are planning to add or expand non-operating room services. This text can be recommended to all anesthesia care providers involved in the provision of anesthesia in non-operating room settings.' -Anesthesia & Analgesia (Volume 122(1), January 2016, p 286-287) The practice of non-operating room anesthesiology has spread widely in the last twenty to thirty years, Drs Weiss and Fleisher point out in this book. The three main reasons contributing to this development - which has improved patient safety - are: the growth in the number of number of drugs available, breakthroughs in medical technology, and innovations in anesthetic techniques. Well-organized material in the chapters include an introduction to the chapter title; main topics and subtopics within them; boxes with enumerated steps, for example, and other information; photos with descriptive captions; and tables with detailed information. A Conclusion and References are provided at the end of each chapter. This is an excellent work in this relatively new and growing specialization within anesthesiology. In my opinion, this is an essential book to have for any medical student or resident preparing for a practice in anesthesiology, as well as any practicing physician interested to learn more about non-operating room anesthesia. Nano Khilnani 'In this book, Drs. Mark Weiss and Lee Fleisher have provided an important tool to address both the challenges and opportunities for anesthesiologists in providing non-operating room anesthesia (NORA) care.' **Foreword:** ?Roger A. Moore, Clinical Associate Professor of Anesthesiology and Critical Care, Feb 2015"
