The delta experiences its hottest temperatures in July and August averaging 30°C with a maximum of around 48°C. Winter temperatures are normally in the range of 5 to 10°C. The Nile delta region is quite humid during the winter. Cairo is located on the banks and islands of the Nile river in the north of Egypt immediately south of the point where the river leaves its delta. Nile river dams and reservoirs in 1843 it was decided to build a series of diversion dams, barrages or weirs across the Nile at the head of the delta about 12 miles downstream from Cairo so as to raise the level of water upstream to supply the irrigation canals and to regulate navigation.
