"Pressestimmen This book is pure, sunshine-yellow, stop-me-guys-if-I'm-being-crazy California deep-think ... **thoughtful, stretching and occasionally brilliant.** (The Sunday Times) Don Hoffman is widely regarded as **one of the deepest and most original thinkers of his generation** of cognitive scientists. His startling argument has implications for philosophy, science, and how we understand the world around us. Yet despite his powerful intellect and strong opinions, Hoffman is a genial writer with an unfailingly pleasant voice.' (Steven Pinker, Johnstone Family Professor, Department of Psychology; Harvard University; Author, 'The Sense of Style'; and 'The Better Angels of Our Nature') In this **masterpiece of logic, rationality, science, and mathematics**, Donald Hoffman dismantles the local realism of Albert Einstein and the 'astonishing hypothesis' of Francis Crick, the scientific giants of the century. **Read this book carefully and you will forever change your understanding of reality**, both that of the universe and your own self. (Deepak Chopra) Hoffman's truly radical theory will force us to ponder reality in a completely different light. Handle with care. Your perception of the world around you is about to be dismantled! (Chris Anderson, author of 'TED Talks') Think you know what's really out there? Read this **breathhtaking**, whistle-stop tour of a book that illuminates all the profound weirdness masked by our experience and assumptions. (David Eagleman, best-selling author of 'The Brain' and 'Incognito') Empirical research on the human brain has made breathtaking progress during the last three decades. What's missing, though, is an attempt to see the 'big picture' of the kind Don Hoffman has introduced in this book. And he does so with the **wit, clarity and originality** that characterizes all his work. (VS Ramachandran MBBS, PhD, FRCP, DSc, UCSD and Salk Institute.) **A fresh view into who we truly are?** one that transcends the perceptions that we accept as reality. Hoffman unapologetically takes us down a rabbit hole where we learn that all reality is virtual and that truth lies solely in you, the creator. (Rudolph Tanzi, coauthor of 'Super Brain') **Captivating and courageous ... anyone who reads this book will likely never look at the world the same way again.** Hoffman challenges us to rethink some of the most basic foundations of neuroscience and physics, which could prove to be exactly what we need to make progress on the most difficult questions we face about the nature of reality. (Annaka Harris, author of 'Conscious') Über den Autor und weitere Mitwirkende **Donald D. Hoffman** is a Full Professor of Cognitive Sciences at the University of California, Irvine. He is the author Visual Intelligence (Norton, 1998), as well as over one hundred scholarly articles on various aspects of human perception and cognition. He received a Distinguished Scientific Award of the American Psychological Association for early career research into visual perception, the Rustum Roy Award of the Chopra Foundation, and the Troland Research Award of the US National Academy of Sciences. His TED Talk entitled 'Do we see reality as it is?' (2015) has been viewed over 2.5 million times."
