"Synopsis Hermeneutics as a type of interpretation theory has traditionally been thought to apply primarily to texts, linguistic phenomena and processes of reading. Don Ihde's 'Expanding Hermeneutics' examines the history and contemporary development of interpretation theory, with a special emphasis on how science in practice involves and implicates interpretive processes. He argues that the sciences have developed a sophisticated visual hermeneutics that produces evidence by means of imaging, visual displays and visualizations which rely particularly upon the holistic abilities of perception - primarily visual perception. Über den Autor und weitere Mitwirkende Don Ihde is a distinguished professor of philosophy at SUNY Stony Brook. He is the author of numerous books, including *Instrumental Realism* (Indiana University Press, 1991) and *Postphenomenology* (Northwestern University Press, 1993)."

In its third year of an ambitious growth initiative northwestern engineering s department of computer science has hired a new department chair and is in the process of hiring 20 tenure track faculty members as well as more than doubling the

Dilip Gaonkar is professor in rhetoric and public culture and the director of center for global culture and communication at Northwestern University. He is also the director of center for transcultural studies and an independent scholarly research network concerned with global issues. He was close to a picture is worth a thousand words or so the saying goes but it is what a picture fails to say that can make it dangerous especially in times of uncertainty. This week the Northwestern Buffett Institute for Global Affairs welcomed Northwestern computer science and journalism professor Dr. Jessi, COVID-19 resources.
