"Pressestimmen 'Davies presents a clear picture of what it was like for F-4 II crewmen when they hit problems in air-to-air, interdiction, and close support sorties. Along with striking targets in South Vietnam, carrier-based planes bombed North Vietnam and Laos. In addition to normal survival concerns, crewmen coped with problems ranging from frustration due to complex rules of engagement to the dealing with the rationale behind awarding medals. Davies emphasizes stories involving hunting and killing MIGs, the premier accomplishment of fighter jocks.' - VVA Veteran'I also have never seen described in such detail the complicated train of events of May 10, 1972, when U.S. fighter aircraft shot down 11 North Vietnam MiGs and U.S. forces lost two Air Force F-4s and two U.S. Navy aircraft during that war's most intense day of air-to-air combat. This new research should serve as a reference for historians and enthusiasts alike.' - Naval Aviation News'This is a new history is to be used as a reference by historians and enthusiasts alike.' - Wings of Gold Magazine Werbetext Detailed study of one of the US's most famous post-war aircraft, the F-4 Phantom, which saw service in three branches of the US military during the Vietnam War. Alle Produktbeschreibungen"

American units that operated the F 4 Phantom II are listed below the Phantom entered service with the US Navy on 30 December 1960 with the VF 121 Pacemakers at NAS Miramar the VF 74 Be Devilers at NAS Oceana

While the US Navy, US Marine Corps and the US Air Force all flew the F 4 Phantom II they were not the exact same plane each branch had different variants of the F 4 Phantom II is perhaps the most famous postwar fighter primarily used as a land based fighter bomber and reconnaissance platform its legend is owed to its naval origins and the immense contribution its original carrier based versions made to the US war effort in Vietnam this title examines the McDonnell Douglas F 4 Phantom II is a tandem two seat twin engine all weather fighter.
